Experience

Assco. QA Automation Engineer
Testbits Sdn Bhd,Kuala Lumpur, Malaysia
September 2022 - February 2023

- Convert manual test cases into automated ones.
- Formulate and expand a set of instructions for automation that can be used in the future.
- Design and improve automation frameworks for testing web, mobile, and API using programming languages such as Groovy, Java, NodeJs, and Appium.
- Engage in agile methodology best practices, such as attending daily standup meetings and using Trello Board and JIRA.

QA Engineer/Game Tester
General Arcade, Kuala Lumpur, Malaysia
March 2023 - Present

- Prioritize testing tasks based on project timelines and deadlines, with a focus on porting arcade games to PS5, Xbox, and Nintendo consoles.
- Execute test cases to validate gameplay mechanics, graphics, audio, and network functionality during the game porting process.
- Collaborate with the development team to troubleshoot and verify bug fixes.
- Review and update test plans and documentation regularly.
- Stay proactive in seeking opportunities to improve the quality assurance process and contribute to the team's productivity and efficiency.

Education

Universiti Teknologi Mara
Bachelor of Information Technologies (Hons)
2019-2022
